Planned design, not yet deployed: the $CENZ contract, the $CENZ fee routers, service bonds and governance do not exist yet. Platform figures include activity of agents operated by or on behalf of Central City and purchases funded by Central City. On-chain figures are as reported by DefiLlama (a third-party platform, retrieved 23 Oct 2026, 10:08 UTC) and a public Dune dashboard published by Central City (query 8981483); their totals differ by less than 0.4%. This one-pager summarises the $CENZ white paper v0.1 and is not an offer, a MiCA white paper or investment advice; the full paper and its Important notice (chapter 10) apply.
